Acta Seismologica Sinica Vol. 4 (1991)

Contents

No. 1

Source parameters of small earthquakes before and after the 1982 Lulong earthquake ... *Weiwen Xiao* (1)

The *Q*-factor and its time window dependence in the area of Western-Yunnan seismological experiment site ... *Tianzhong Zhang, Longsheng Gao and Weiqing Zhang* (15)

Preliminary study of characteristic earthquakes of the Xianshuihe fault zone ... *Hong Qian, Zhuoli Luo and Xueze Wen* (29)

Digital filtering of converted seismic waves ... *Xinglin Lei, Xuezhong Shao and Jiaru Zhang* (43)

Temporal and spatial distribution of two consecutive earthquake rupture ... *Peide Wang, Francis T. Wu and Yuntai Chen* (55)

Effects of barriers and asperities on seismic moment ... *Zhiren Niu, Dangmin Chen and Bingqian Li* (63)

Spatial variations of P wave velocity field in the process of rock deformation ... *Yong Chen, Xianwu Yang and Biao Han* (77)

Adjustment variation of stress field in China with the *M*7.7 Akita earthquake, Japan of 1983 ... *Zhaodong Zhang, Jinhan Zheng and Chugang Feng* (87)

Tectonomagnetic experiment around Miyun reservoir ... *Zhijia Zhan, Jintian Gao, Rongsheng Hu, Hongli Zhang, Congli Zhao and Wenzhi Shen* (101)

The mechanism of electromagnetic wave radiation during earthquake ... *Lianda Zheng* (113)

The relationship between resistivity variation and strain in a load-bearing rock-soil layer ... *Yulin Zhao, Fuye Qian and Tongchun Xu* (127)

Conditions and genesis of induced earthquakes in the Wujiangdu Reservoir area ... *Chaosong Jiang, Wanli Peng, Shaojin Wang and Jirong Li* (139)

A typical case for the relationship between drought and strong seismic activity ... *Minquan Ye* (153)

* * *

Catalogue of Earthquakes (March—May 1990) ... (165)

No. 2

Precursor for earthquakes of $M_L \geqslant 5.0$ in North China, Concentrated and continuous activity of moderate earthquakes ... *Shujun Yu* (171)

Acta Seismologica Sinica Vol. 4 (1991)

No. 2

Precursor for earthquakes of $M_L \geqslant 5.0$ in North China, Concentrated and continuous activity of moderate earthquakes ... *Shujun Yu* (171)

Accurate hypocenter determination of aftershocks of the 1985 Luquan, Yunnan Earthquake ... *Mingxi Wu, Ming Wang Cichang Sun, Zhaoming Ke, Peide Wang, Yuntai Chen and Francis, T. Wu* (181)
Amplitude envelope shape of S-waves in three-component seismograms of small local earthquakes and determination of Q-value ... *Mingzhi Yang* (193)
Horizontal principal stress axes in Sichuan Basin inferred from oil-well breakouts ... *Ajia Gao, Zhonghuai Xu and Jiageng Chen* (209)
Source parameter inversion in the presence of the geoidal deformation resulting from earthquake dislocation ... *Ximing Gao, Xiaoxiong Zhong and Weizhong Wang* (219)
The seasonal variations of S_q (H) at the geomagnetic observatory-chain in Eastern China ... *Yufen Gao and Geng Zhou* (235)
Further application of magnetotelluric sounding in the probe of earthquake precursor ... *Changyou Lin, Xiaoling Liu and Yuxia Wu* (245)
The characteristics of deep structure of the north segment of the North-South Seismic Belt ... *Guipei Liang and Weijuan Li* (259)
CO_2 discharges and earthquakes in Western Yunnan ... *Zhiguan Shangguan and Songsheng Gao* (275)
Assessment of seismic intensity by using grey cluster method ... *Tongyu Wu and Yana Zhuang* (287)
Photoelastic study of closed cracks under compression-shear stress ... *Jianhua Wang, Jinliang Song, Deyi Feng and Chun Jiang* (299)
Experimental research on rock failure ... *Xiaoxin Yao, Delun Lai and Laifeng Zhang* (311)
A brief account of China's first seismic station—the Chiufeng (Jiufeng) Seismic Station ... *Xinling Qin* (319)

Catalogue of Earthquakes (June–August 1990) ... (325)

No. 3

Observation of near-field strong ground motion and seismic source feature analysis for the earthquake swarm of Xunwu, Jiangxi Province of August 2, 1987 ... *Xiangxiong Chen, Xian Zhang, Longsheng Ke, Xueren Ding and Weidong Xu* (329)
Preliminary study of the displacement distribution and ruptured state of earthquake faults ... *Zhangming Wu* (345)
A preliminary study of focal depth distribution in the Beijing–Tianjin–Tangshan area ... *Zhifeng Ding and Rongsheng Zeng* (355)
The role of fault gouge in the seismogeny of earthquakes ... *Yunhao Zhou and Kunyuan Zhuang* (363)
Research on quantitative recognition of potential earthquake sources by fuzzy reasoning and power mode of thinking ... *Xingxin Du and Yunyu Ding* (375)

Fuzzy synthetical evaluation of earthquake circumstances ··· *Xuejun Yu, Lixun Yao, Guoying Sheng and Xiaoyu Hou* (385)
The Tangshan earthquake and Holocene tectonic stress field ··· *Jingming Wang* (397)
Calculation of the theoretical earth tides of a rotating ellipsoidal elastic earth model ··· *Qingpeng Wu* (409)
Modified Monte Carlo inversion method and its application to inversion of magnetotelluric sounding data ··· *Zhisheng Feng and Guohua Fan* (421)
Homomorphic signal processing for reverberant seismic signals ··· *Changxi Zhou and Guoming Xu* (431)
Geophysical experiments of km-size and characteristics recorded in focal region ··· *Zhizhen Zheng* (441)
The distribution characteristics of modern literature of seismological science and technology in China ··· *Shoucheng Sun and Zhongchun Xu* (451)

[Research Notes]

Inversion of potential field with arbitrary three-dimensional density and magnetization distributions—Theory and method ··· *Huaxiao Wang and Rui Feng* (459)
Strain accumulation and release in Xianshuihe fault zone ··· *Jianzhong Li and Benpei Liu* (465)

* * *

Catalogue of earthquakes (September–November 1990) ··· (475)

[Recent Development of the Seismological Society of China]

First meeting of the third session of the board of directors of the Seismological Society of China held in Beijing ··· (479)

No. 4

Fracture system models of earthquake sequences of $M_S \geqslant 7.0$ in North China and synthetic inversion of fracture processes ··· *Zhili Zhang, Yu-chiung Teng, Chengbao Wang and Hua Tian* (483)
A "dense-quiet" characteristics of small shocks before the major events of the 1966 Xingtai earthquake ··· *Banghui Lin, Xiaoxing Hu and Ran Zhou* (499)
A study on coda Q value and its relationship with frequency of Luanxian region, China ··· *Songlin Li, Jichang Fan, Nailing Hui, Jian Yang and Guixiang Sun* (509)
Lateral inhomogeneity of crust and upper mantle in southern Liaoning, China and its relationship with the $M = 7.3$ Haicheng earthquake ··· *Zaoxun Lu, Guodong Liu, Menghua Wei, Puzai Meng and Junmeng Zhao* (521)

On the adjustment for an attached gravimetric net ····· *Zhiheng Jiang* (535)
Characteristics of surface rupture of El Asnam (Algéria) earthquake and the study of paleoearthquakes ····· *Shunmin Guo, P. Tapponier, Zhitai Chen, M. Meghraoui, Hongfa Xiang, Shuhua Cai and B. Meyer* (547)
Evolution and mechanism of earthquake sequences induced by water injection in the Jiao Well 07 of Shengli Oil Field, Shandong Province ····· *Shouzhong Diao, Haikun Jiang and Xueyan Xu* (559)
Preliminary research on the geological problems of earthquake engineering in Shenyang region ····· *Qingrui Kong and Jian Zuo* (569)
Experimental research on the stop or delay effects of weak barrier influencing on main fault in the unstable extending process of stick-slip ····· *Zhenye Lu, N. Kato, K. Yamamoto and T. Hirasawa* (579)
Study on the interference field of high voltage power lines in earth resistivity observation ····· *Anzhong Jin, Yanzhu Li, Runxian Li, Tianbao Li, Jia Li, Qiang Zhao and Ziquan Wu* (593)

[Research Notes]

Geomagnetic anomalous variations before Lancang-Gengma earthquake on November 6, 1988 ····· *Guohua Fan, Tongqi Yao, Zuowen Gu and Kejia Zhu* (601)
The study of attenuation of coda waves in the Beijing region ····· *Wanqin Liu, Shizhong Wei and Shuyi Xin* (611)
A comparative study on tectonic and collapse earthquakes ····· *Huaicun Lin, Baoping Wang, Hongrui Liu and Jiukun Jiang* (619)

* * *

Catalogue of earthquakes (December, 1990–February, 1991) ····· (629)
